GST Job Work Management System:

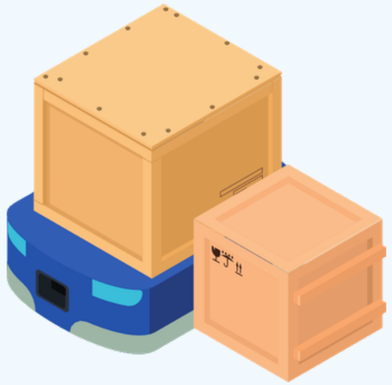

Project Overview

A digital solution designed to automate Job Work Management, Inventory Tracking, Challan Processing, and Project Monitoring, ensuring seamless coordination between departments.

Project Roles:

Role	Responsibility
Management	Handles inquiries, quotations and approvals
NPD	Project creation, BOM preparation and assignment
Accounts	Vendor management and purchase order processing
Store Incharge	Inventory management and material issue
Vendor	Supplies required materials
Project Manager	Manages project execution

Project Approval Process

- **Project Steps:**
  - Management uploads project file
  - NPD prepares quotation
  - Management approves quotation
  - Client approval received
  - Project execution starts

- **Project Execution Models**

1) Regular Execution

- Complete product manufacturing
- End-to-end production process

2) Job Work Execution

- Process-based manufacturing
- Internal Processing
- External Processing

Internal Job Work:

- **Updated Workflow**
  - Project Manager creates and uploads the job work request.
  - Store Incharge verifies the material details.
  - Store Incharge uploads the challan and validates the records.
  - Accounts Department reviews the challan and completes the final processing.

- **Key Enhancements**

✔️ Store Incharge verification for improved process control

✔️ Enhanced inventory & material tracking

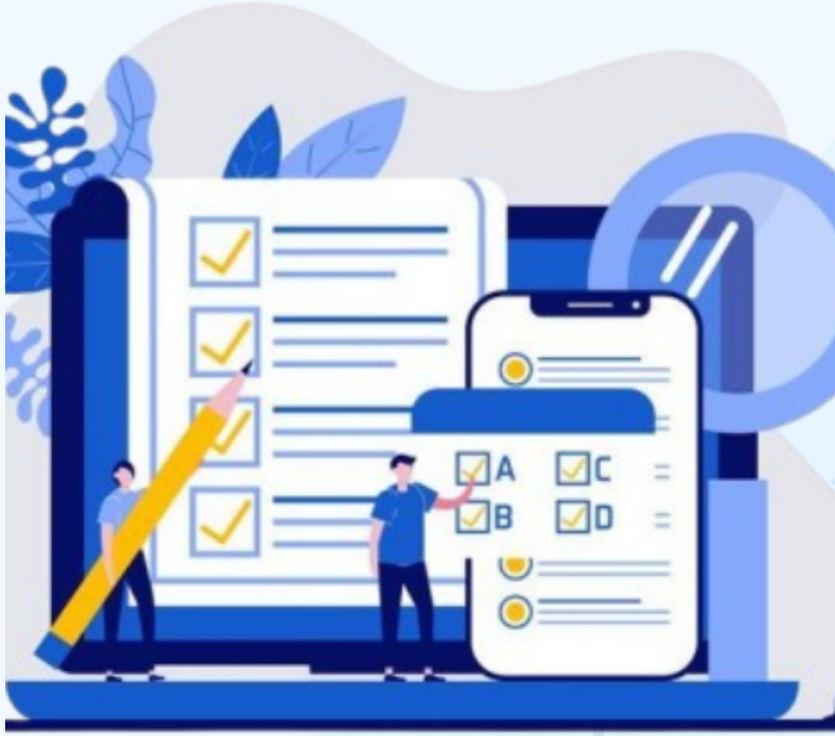

✔️ Simplified challan management and approval process

Vehicle & Challan Management:

- **Vehicle Details**
  - Vehicle Number
  - Loaded Weight
  - Unloaded Weight

- **Challan Process**
  - Challan added by Store Incharge
  - Verified before submission
  - Forwarded to Accounts

- **Benefits**
  - Material tracking
  - GST documentation
  - Better record management

Material & Inventory Management

- **Bill of Materials (BOM)**
  - BOM uploaded by Project Manager
  - Automatic inventory check

- **Material Procurement**
  - If stock is unavailable:
    - Purchase request generated
    - Accounts approval
    - Vendor supplies material

- **Worker Assignment**
  - Worker assigned by Project Manager
  - Material issued for production

External Job Work & QR Tracking:

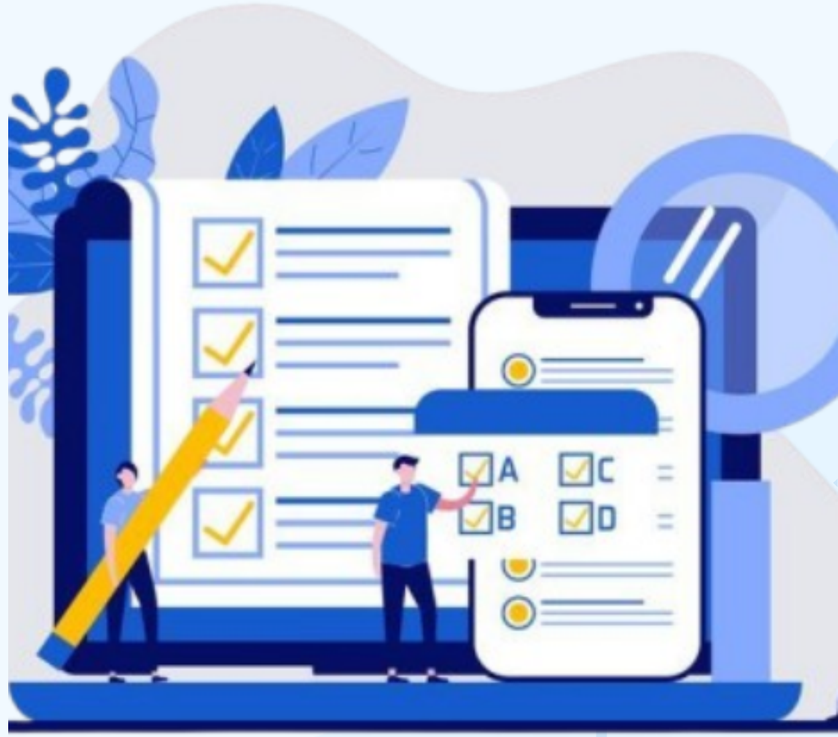

- **External Job Work**
  - Client sends materials for job work.
  - Store Incharge receives and verifies the materials.
  - Material details are recorded and assigned to the Project Manager.
  - Project Manager assigns the job to the respective worker for processing.
  - Completed product is verified and returned to the client

- **QR Code Tracking**
  - QR code generated for each material
  - Material issue and return recorded digitally
  - Real-time stock and movement updates

External Material Receiving Process:

- NPD notifies the Accounts Department about the incoming customer materials.
- Accounts prepares the challan details and assigns the request to the Store Incharge.
- Store Incharge receives and verifies the materials received from the client.
- Verified materials are automatically updated in the External Inventory.
- A confirmation is sent to Accounts, and the existing External Job Work process continues.
