GST Management ERP System

Under the guidance of:

**Dr. Shashidhar Muniyappa
M.D.,SVCE Bengaluru**

**Dr. Mukesh Kumar Singh
HoD(CSE),SVCE Bengaluru**

ERP Purchase & Inventory Management System

- It explains the complete process from customer order to material procurement and stock update.
- The system integrates different departments such as Admin, NPD, Stores, Accounts, QA, Vendor, and Customer.
- It ensures proper coordination, tracking, and approval at every stage.
- The goal is to improve efficiency, accuracy, chase and inventory and transparency in operations ✕

Assigned Work :

- The roles and responsibilities of NPD, Stores, Accounts, QA, and Vendors.
- The purchase order creation process and approval flow.
- Observed vendor selection and material inward procedures.
- QA inspection, partial delivery handling, and stock update mechanisms.
- Documented the end-to-end workflow in a structured manner

Completed Work :

- Handling of material inward, partial deliveries, and pending quantities.
- QA verification ensures material quality before stock acceptance.
- The role of Accounts in managing GST, HSN, pricing, and vendor master data.
- System-driven approvals and validations ensure data accuracy, compliance, and process control.
- Centralized data entry improves audit compliance and reporting accuracy
